Capgemini

Aguascalientes, Ags. Mexico

Senior Test Automation Engineer

August 2025 - Present

Senior Quality Engineer responsible for leading quality assurance activities for Insurance platforms, ensuring the successful delivery of business-critical and regulatory releases through risk-based testing, automation governance, and cross-functional collaboration.

Partner closely with Business Analysts, Product Owners, Software Engineers, and Automation teams to define testing strategies, improve quality processes, and drive continuous delivery initiatives. Contribute to automation frameworks, CI/CD validation processes, and AI-assisted engineering practices to improve efficiency, scalability, and release confidence within Agile environments.

- Lead test planning, estimation, risk assessment, and execution activities for multiple concurrent initiatives, supporting quarterly regulatory releases and business-critical enhancements.
- Design, develop, and execute comprehensive test scenarios across Web UI, APIs, databases, and integrated backend systems, ensuring end-to-end validation of complex insurance workflows.
- Review business requirements, user stories, technical specifications, and acceptance criteria with Business Analysts and Software Engineers to improve testability, identify gaps early, and reduce downstream defects.
- Define test strategies and quality gates for Smoke, Sanity, Functional, Integration, Regression, and User Acceptance Testing phases.
- Execute API validation and integration testing using SOAPUI and backend data verification through SQL analysis and database validations.
- Support CI/CD quality processes within Azure DevOps pipelines, helping improve release readiness and deployment confidence through automated validation checkpoints.
- Monitor, analyze, and troubleshoot automated test executions, performing root cause analysis on failures and coordinating defect resolution efforts with development teams.
- Maintain and enhance reusable automation assets and regression suites, improving test stability and reducing manual validation effort across recurring releases.
- Collaborate with automation engineers to expand automation coverage and improve framework reliability, execution efficiency, and maintainability.
- Established reusable baseline validation workflows for core insurance business processes, enabling faster test design, improved consistency, and reducing sprint preparation effort by up to 40%.
- Improved regression suite efficiency through automation maintenance, execution optimization, and failure analysis, reducing release validation turnaround time by nearly 25%.
- Standardized test data creation and validation processes using reusable datasets and SQL utilities, decreasing test data preparation effort by more than 30% while improving test reliability.
- Participate in defect triage, root cause investigations, release readiness reviews, and production validation activities to ensure high-quality software delivery.
- Develop detailed test plans, test cases, traceability matrices, and quality metrics to provide stakeholders with visibility into release health and testing progress.
- Drive continuous improvement initiatives by identifying process bottlenecks, improving QA workflows, and promoting quality engineering best practices across teams.
- Leverage AI-assisted engineering tools including GitHub Copilot and Claude to accelerate test design, test data generation, defect analysis, documentation creation, and automation development activities.
- Mentor QA team members and contribute to knowledge-sharing initiatives focused on automation, API testing, SQL validation, Agile methodologies, and quality engineering practices.

IBM

Aguascalientes, Ags. México

Software Test Lead - QA Test Developer

January 2022 - July 2025

Test Lead overseeing multiple projects in Storage Systems Development, Spectrum Virtualize, Storwize Flash System, and Auth0. Test automation, functional validation, and performance analysis using Python, Selenium, Playwright and CodeceptJS. Experienced in designing automation frameworks for Web, API, and Microservices testing, and integrating them into CI/CD pipelines. Strong focus on data validation, performance optimization, and delivery of high-quality enterprise storage solutions in Agile environments.

Provide guidance to team members by defining clear roles and responsibilities, serving as an escalation point for critical issues, and managing vendor relationships throughout the engagement, testing, and deliverable phases.

- Designed, developed, and executed automation frameworks for GUI, API, and Microservices testing using Playwright, CodeceptJS, Selenium, and Python.

- Integrated automated test suites into CI/CD pipelines with Jenkins, ArgoCD, and Testomat.io, accelerating delivery cycles.
- Led automation and performance analysis across storage systems, driving improvements in deduplication, compression, and caching features.
- Collaborated with development and product teams to align automation strategies with system design and client requirements.
- Monitored, debugged, and reported regressions and performance issues using Jira, Trello, and Monday, ensuring proactive risk management.
- Performed performance testing and modeling with Oracle Vdbench, Perfweb, and Perfauto to evaluate scalability and storage system reliability.
- Generated data-driven reports through scripting and SQL querying, enabling clear performance comparisons and actionable insights.
- Assisted technical sales by providing automation-driven recommendations for client storage requirements.
- Contributed to code reviews and internal knowledge base development to improve automation best practices.
- Mentored and guided QA teams by defining clear roles, responsibilities, and escalation processes.
- Achieved “Champion Learner – Gold” distinction (top 6% at IBM).
- Awarded the Innovative Technologies – Cloud Squad Award, featured in IBM’s *CTG Magazine: innovaTec*.

QASource
Aguascalientes, Ags. Mexico
Sr. QA Software Automation Test Engineer/Lead Quality Engineer
June 2018 - December 2021

QA Automation Test Engineer leading and executing manual, automated, and performance testing across Web, API, Mobile, and Desktop platforms. Specialized in automation frameworks with Selenium (Python), API automation (Postman, Pytest with Request), and performance testing (Apache JMeter). Experienced in Agile environments, system integration, and regression automation, ensuring high-quality deliveries in Healthcare and Salesforce projects.

- Designed and implemented automated test cases for using Selenium with Python, increasing test coverage and efficiency.
- Developed and executed API test automation using PyTest and Requests, complemented with Postman for validation and integration testing.
- Performed integration testing of microservices and APIs with Postman and PostgreSQL databases.
- Conducted performance testing with Apache JMeter (Load, Stress, Endurance, Spike) to validate system scalability and reliability.
- Verified cross-browser and mobile application functionality using BrowserStack, Virtual Machines, and custom scripts.
- Collaborated with developers to define test criteria, create reusable scripts, and align automation with feature design.
- Applied Agile practices, collaborating with Product Managers, QAEs, SDETs, and SDEs to maximize test coverage, release velocity, and product health.
- Used Azure DevOps, Microsoft TFS, Jira, and Confluence for test management, defect tracking, user stories, and agile processes.
- Monitored all stages of software development, reviewing requirements, specifications, and design documents to identify and resolve malfunctions.
- Documented, tracked, and managed bugs and regression testing through defect lifecycle resolution.
- Provided demos, training, and mentoring to QA team members, supporting skill development and knowledge sharing.
- Analyzed and monitored data for testing using Google Analytics and Google Tag Manager.
- Recognized with the Top Performance Rating for 3 consecutive years.

iSQI - International Software Quality Institute
Aguascalientes, Ags. Mexico
Consultant and volunteer collaboration
July 2020 - October 2023

Collaborator and consultant for the iSQI group, sharing information and knowledge regarding software testing worldwide in different formats such as articles, videos, and webinars.

- Built and developed online programming and helped with the online video presence with more than 6000 followers.
- Writer on an article for SQ_mag #9 which is viewed worldwide in digital form and distributed physically in Germany https://www.sq-mag.com/all-issues/sq-mag-no-9/ (free, just asks for an account).
- Writer on an article for SQ_mag #12 which is viewed worldwide in digital form and distributed physically in Germany https://www.sq-mag.com/sq-mag-no-12/ (free, just asks for an account).
- Writer on an article for SQ_mag #13 which is viewed worldwide in digital form and distributed physically in Germany https://www.sq-mag.com/sq-mag-no-13/ (free, just asks for an account).
- Participated in the A4Q World Congress for an international audience.

The QA Testing Channel
Account Manager/Partner and certified instructor
Aguascalientes, Ags. Mexico
May 2018 - June 2021

Certified instructor partner of The QA Testing Channel, giving conferences and talks regarding Software Testing, Computer Science and software Engineering, Databases, among other various topics.

- Creation, design and preparation of courses, training activities and materials.
- Working as a member of the learning and development team in carrying out the assessment of training needs, also identifying/assessing training and development needs.
- Follow up on prospecting and closing sales.
- Creation of YouTube content, including video editing.
- Collaboration on "QAfé Talks" Podcast with Hands on QA company, series available on Spotify, YouTube, TikTok, Anchor, Breaker, Google Podcast, Overcast, Pocket Cast, Facebook and LinkedIn.

Capgemini
Quality Assurance Test Engineer
Aguascalientes, Ags. Mexico
December 2016 - May 2018

QA Engineer specialized in designing, updating, and executing manual and automated tests for communication sector web applications.
Led, coordinated, and managed offshore and nearshore testing teams, ensuring traceability and full coverage for large-scale, complex projects. Implemented and executed automation scripts for GUI and API testing using Selenium, Java, and REST Assured, contributing to improved efficiency and faster feedback cycles. Conducted detailed analysis, inspection, design, and integration to guarantee software quality, while proactively identifying, clarifying, and escalating risks. Collaborated with Software Development Engineers to understand overall system architecture and feature implementation.
Responsible for defect management, test reporting, and quality control and training team members.

- Designed and executed automated test cases for Web (Selenium, Java) and API testing (Postman, REST Assured).
- Integrated GUI and API automated tests into Agile delivery pipelines, ensuring faster feedback cycles and higher coverage.
- Developed scalable and reusable automation scripts, reducing manual testing effort and accelerating regression cycles.
- Analyzed business requirements and translated them into functional and non-functional test scenarios.
- Managed defect tracking, reporting, and resolution through Jira and HP Quality Center.
- Collaborated with developers to align automation strategy with system architecture and features.
- Conducted regression, sanity, and end-to-end testing across Desktop, Web, and Mobile platforms.

Softtek
Software Engineer, QA data Analyst
Aguascalientes, Ags. Mexico
August 2015 - December 2016

International support for General Electric Turbines, including remote testing of software and hardware and communication with engineering teams using various applications. Monitored tools and databases to ensure 24/7 uptime availability for critical software for electrical facilities and used oracle databases and network technologies to troubleshoot servers and extract and analyze data. Worked with tickets in the Servicenow tool to ensure security of facilities and assets.

- Data extraction, analysis, testing and reporting with SQL.
- Testing and troubleshooting software applications and hardware servers infrastructure for network support.
- Handling and working with prioritized tickets in the Servicenow tool.
- Identifying, testing, tracking and reporting KPI trends over the course of the projects
- Exceeded issue-resolution targets and achieved exemplary customer satisfaction scores.
- Developed an internal tool to recollect and organize data of the project which improved the efficiency of the onboarding process and the general search of information, recognized and awarded by the upper management.

Click Computers and Services
QA Test Lead
Aguascalientes, Ags. Mexico
May 2014 - December 2016

Manual testing for Web Systems, performing functional, regression, exploratory and smoke testing for web and desktop systems using HP ALM. Testing and validation of new products, and new releases of existing products, giving support to several clients to keep their web pages updated and running correctly, adding and updating modules to them and administering databases, Collaborating with technical leads, and development teams on testing, problem solving, troubleshooting and resolution of product issues.

- Test Design, test scenarios and test cases and execution.
- Defect Identification, troubleshooting, retrieval of logs and proposed regression tests to discover reoccurrences.
- Lead point of contact between automation and testing teams.
- Database validation with SQL server and Oracle SQL.
- Validation of working software on multiple mobile devices and OS.

EDUCATION

Technological University of Aguascalientes (UTA). Aguascalientes, Ags. Mexico
Bachelor of Systems Engineering
Honors: Received the Top graduate Award in the UTA's Anniversary event and participated on the "Successful graduated" panel at the University.

Technological University of Aguascalientes (UTA). Aguascalientes, Ags. Mexico
University technician in Information Technologies for Development (TSU)

San Antonio´s Alamo Colleges. San Antonio, Texas. United States
Certificate of completion for international program

Tecnológico de Monterrey Aguascalientes, Ags. Mexico
Full-Stack Coding Boot Camp

Skills, Certifications and Courses

- **Programming:** Python, Javascript, TypeScript, Java, SQL, Node.js

- **Technical Skills:** Playwright, Selenium, Maven, Gradle, TestNG, Cucumber, PyTest, Requests, CodeceptJS, Chai, Mocha, Jest, REST Assured, GitHub Copilot, Google AI, Claude, Codex, JFrog Artifactory, Apache JMeter, Oracle Vdbench, PerfWeb, PerfAuto, Thunder Client, Postman, Newman, Swagger, Karate DSL, Google Analytics and Tag Manager, JSON, XML, YAML, CSS, HTML, Linux shell scripting, MySQL, Oracle SQL, PostgreSQL, Jenkins, GitHub Actions, ArgoCD, Azure DevOps, IBM Cloud, AWS, HP ALM Quality Center, Testomat.io, Jira, Xray, Trello, Microsoft TFS, Monday management, Git, GitHub, GitLab, BrowserStack, LambdaTest, Tableau, Microsoft Office, Microsoft Project, MindView, VMware Workstation, Apple's iMovie

- **Operating Systems (OS):** Linux, macOS, Apple's watchOS, IOS, Android, Windows, Windows Server

- **Certifications:** ISTQB Testing with Generative AI, ISTQB Test Automation Engineering, ISTQB Advanced Level Test Manager, ISTQB Agile Tester, ISTQB Foundation Level, A4Q Certified Selenium Tester Foundation, Claude Certified Associate, Scrum Master, Google Project Management, Google AI, AWS Certified Cloud Practitioner, Microsoft Azure Fundamentals (AZ-900), IBM Cloud Essentials, GitHub Foundations, GitHub Copilot, Oracle Java Certified Foundations Associate, Harvard University CS50P Programming with Python, Harvard University CS50x Computer Science, Harvard University Web Programming with Python and JavaScript, Computer Science and Programming Using Python by MIT, Playwright with JavaScript – Test Automation University, Continuous Integration with Jenkins – Test Automation University, Postman API Fundamentals, Python Institute PCEP, Programming with Python by Meta, Programming with JavaScript by Meta, Certified Python Developer – W3Schools, Mainframe Specialist – Linux Operations and Programming, Project Management STPS DC-3, Scrum Fundamentals, Microsoft Software Development Fundamentals, Microsoft Database Administration Fundamentals, Microsoft Querying Data with SQL, Microsoft Software Testing Fundamentals, Google Analytics, Google Cloud Computing, Google AI, HIPAA Security Training, HIPAA Awareness Training for Business Associates, DB Administrator and Analyzer – TELMEX, ICarnegie Software Development Program, ICarnegie Computing and Problem-Solving, Codecademy Python, freeCodeCamp JavaScript, freeCodeCamp Scientific Computing with Python.
